- only 46 mm wide -

LFS
30mm

LFM
46mm

► APPLICABLE MOUNTERS

Fuji, Juki, Micronic, Yamaha, Panasonic, ASM

► FEATURES

The automatic marking per label feeder is a cost-efficient and simple solution which is used in several cases.

The Slim Line Label Feeder is the perfect solution for small labels – with the revolutionary width of 30 mm it needs one feeder position only in the pick and place system.

→ Maximize production space and reduce operational costs

► KEY BENEFITS

- Compatible with many popular pick and place systems and special machines
- Feeds the label very simple like a component
- The flexible solution for marking your boards
- Precise and automatic placement of labels
- Reliable electronic operation
- Low maintenance costs
- Saves time and money
- Not only label but also odd components can be fed with the label feeder
